Professional Summary

Computer Science undergraduate with strong interest in machine learning, data structures, and backend systems. Experienced in building Full Stack applications using Python, JavaScript, React, and Node.js. Currently exploring machine learning models including Linear Regression, Logistic Regression, and SVM for real-world applications.

Technical Skills

Languages: C, Python, Java, Javascript
Frontend: React.js, HTML, CSS
Backend: Node.js, Express.js
Database: SQL, MongoDB
Core CS: DBMS, Operating Systems, OOP
Tools: Git, GitHub, VS Code
GitHub: https://github.com/ruthwik21ch

Projects

Medigen – AI-Powered Pharmacy Web Application Github

Developed a full-stack web application that enables users to browse medicines, manage prescriptions, and place orders through an intuitive interface. Implemented secure authentication, cart management, and order tracking using React Context API for state management. Integrated AI-powered features including a chatbot and prescription scanner to assist users in identifying medicines and obtaining information. Built an admin dashboard for managing medicines and monitoring platform activity. The frontend was developed using React and TypeScript with Vite for optimized performance, while the backend server handles database operations and API services.

Key Features:

- User authentication and role-based admin access
- AI chatbot integration using Google Gemini API
- Prescription scanning and medicine identification
- Shopping cart and checkout functionality
- Order tracking and saved medicines feature
- Admin dashboard for medicine management
- Email notification service integration

NewsFeed – Python Desktop News Application Github

Developed a desktop-based news reader application using Python and Tkinter that fetches real-time news headlines through the NewsAPI. Implemented a user authentication system with SQLite database support for secure login and registration. The application displays news articles with images, titles, and descriptions, and includes navigation features to browse multiple articles. Integrated text-to-speech functionality using pyttsx3 to enable voice-assisted news reading. Users can also open full articles in a web browser for detailed reading.

Key Features:

- User login and registration system using SQLite
- Real-time news fetching via NewsAPI
- Image display with fallback handling for missing images
- Voice-assisted news reading using text-to-speech
- Article navigation with Next/Previous functionality
- Option to open full news articles in the browser

SteganoPro – Python Desktop Steganography Application [Github]

Developed a desktop-based steganography application using Python and Tkinter that enables users to securely hide and extract secret messages within image files. Implemented image processing techniques with the Pillow library to encode and decode data without visibly altering the image. The application provides a simple and user-friendly interface for both encryption and decryption operations. Added optional password protection to enhance data security. Designed the system to support common image formats and ensure efficient and reliable data concealment

Key Features:

- Securely hides secret messages inside images
- Extracts hidden messages from encoded images
- Supports common image formats like PNG and JPG
- Provides optional password protection for added security
- User-friendly interface built with Tkinter
- Fast and efficient encoding and decoding process
- Easy file handling for loading and saving images

Education

B. Tech – Computer Science & Engineering
Sree Chaitanya College of Engineering (2023-2027)
CGPA: 7.83

Intermediate (MPC) – 81.2%
Vivekananda Junior College, Vemulawada(2021-2023)

Secondary Education -10 GPA
Kerala Model School, Vemulawada (2021)

Achievements

Participated – **Think X Hackathon**
Participated – **Devnovate Hackathon**
Best Performance Certificate – **College Coding Competition**

Certifications

AI Course in Yuva AI for All
AI-Data Scientist in TBOCWWB
CyberWalNet Certificate in Cyber Awareness & Digital Hygiene
